Subject Index—Volume 26, 1961

A

Achromobacter, 635
acid-catalyzed isomerization, 49, 53
acid hydrolysis of olives, 227
acid phosphatases in pineapple stems, 56
Aerobacter, 635
Aeromonas, 635
almonds, 377
amino acid composition of beef, 412
amyloses in rice, 573
anaerobic bacterial spores, 261
anaerobic glycolysis of pork muscle, 297
anthocyanin pigment in fruit rind, 385
anthocyanins, 457
  of cranberries, 318
antimicrobial agent of cheese, 72
antioxidant capacity of
  dihydroquercitin, 139
  quercetin, 139
apples, 389
Arizona group organisms, 618
ascorbic acid loss during estimation, 11
autoxidation of
  beef myoglobin, 469
  fish oil, 192

B

Bacillus
  cereus, 72
  stearothermophilus, 204
  subtilis, 428
bacon, irradiated, 611
bacteria in
  beef, 469
  degradation products, 457
  flaked foods, 428
  foods, 204, 510, 626
  frozen foods, 21, 345
  meat, 631
  plant tissues, 635
  powdered foods, 428
bacterial media, 261
bacteriological data in canning, 218
beans
  black, 525
  cowpeas, 525
  red, 525
  rice, 525
beef, 15, 345, 422, 626
  amino acid composition, 412
  irradiated, 15, 79, 112, 156, 212, 258, 412
  muscle, 469, 485, 535, 581
beets, 31, 389
biceps femoris, 535
binding quality of sausage, 331, 541, 551
biochemical activity in honey, 63
biochemistry of muscle structure, 297, 306
bitter gourd fruit, 416
black pepper oil, 499
bovine tissue, 314, 485
brain heart infusion, 21, 622

bread, 578
brines, cucumber, 84
browning during Maillard reaction, 248
browning in
  fish muscle, 462
  sugar solutions, 397
butterfat, 99

C

cabbage
  dehydrated, 163
  fresh, 163
  rehydrated, 163
caffeine, 600
cancer in mice, 611
Candida lipolytica, 518
canned foods, 53
canning process calculations, 218
carbohydrates in
  citrus peel, 146
  honey, 63
carbonyls in fat, 131
carotenoids in
  fruit, 49, 53
  oranges, 443
  tomatoes, 106
carrots, 389
  dehydrated, 479
cationic dyes, 365
catsup, 122
cauliflower, 416
  frozen, 26
celery, 31, 209, 337
cellulose crystallinity in carrots, 479
cellulose state in peach ripening, 95
characteristics of staphylococci, 631
cheese, aged surface ripened, 72
cheese-like off-odor, 569
chelation capacity of
  dihydroquercetin, 139
  quercetin, 139
chemical changes in
  dates, 323
  orange juice, 276
chemical composition of
  celery plants, 209
  pork muscle, 297, 306
  potatoes, 351
  sardines, 283
chemical properties of
  actin of meat, 178
  actomyosin of meat, 178
chicken, 21, 345
chloroform extraction of flavor, 288
chlortetracycline in egg white, 119
chromatography, 518
  gas, 43, 163, 234, 401, 499, 564, 569, 578
  paper, 131, 192, 239, 337, 385, 485
  partition, 192
  vapor-phase, 373
citrus
  flavor, 401
  peel, 146
citrus oils, cold-pressed, 43
Citrus sinensis, 401
Clostridium botulinum, 72, 345, 626
cobalt glass dosimeters, 204
cocoa
  butter, 99
  powder, 239, 428
coconut oil, 234, 518
color-difference meter, 26
color of
  black ripe olives, 227
  maple sirup, 397
  soy extracts, 359
components of
  beef, 258
  cabbage, 163
  myofibrillar protein, 551
composition of
  aldehydes, 43
  beans, 525
  beef, 15, 112, 422, 485
  citric acid, 648
  citrus peel, 146
  cocoa, 428
  cranberries, 318
  cucumbers, 84
  custard apple pulp, 244
  fatty acid in meat lipids, 581
  fish, 462, 495
  honey, 63
  lamb, 475
  lemon fruits, 593
  oranges, 125, 443
  pears, 564
  plastic fats, 99
  pork, 475
  potatoes, 492
  rockfish, 38
  sauerkraut, 569
  soybean tempeh, 373
  sucrose, 648
  volatile compounds, 670
  xanthophylls in tomatoes, 106
compound responsible for color of olives, 227
constituents of orange oil, 401
corn oil, 99, 234, 518
cornstarch, 587
cranberry, American, 318
cream puff, 436
cream, whipped, 436
crude oil, 557
crystalline rice amyloses, 573
crystallized beef myoglobin, 469
cucumbers, 635
  pasteurized, 84
custard apple peroxidase, 244
custard from unbroken eggs, 618

D

daikon, 31
darkening in dates, 323, 529
dates, domestic, 323, 529
dehydrated
  carrots, 479
  foods, 198
  media, 261
dehydroascorbic acid in plant tissue, 416

deterioration of dates, *323*, 529
diastase values of honey, 63
digestion procedures, 663
dihydroquercitin in lard substrate, 139
disc sensitivity assay of bacteria, 457
discoloration of meat, 469
dry gelatin plates, 186

E

egg
  preservatives, 171
  products, 510
  white, 119
elasticity in sausage, *331*
electron-beam dosage, *204*
electrophoresis, *337*
emulsions, 518
environment relationship of fruits and vegetables, *31*
enzyme-catalyzed degradation, 416
enzyme specificity in fatty acids, *234*
enzymes in
  beef, *79*, 156, *422*
  dates, 529
  green beans, 91
  peas, *273*
  pineapple stems, 56
  plant tissue, 416
  pulp, *244*
Escherichia, 635
  coli, *21*, 457
esters in pears, 564
extensibility of muscle fibers, 535

F

fat oxidation, 198
fatty acid components, 131
fatty acid liberation, *234*
fatty acids of
  meat lipids, 581
  vegetable lipids, *273*
fibrils, 331, 541, 551
fish, 38, 462, 495
  Baltic herring, 606
  cod, 345, 495
  frozen, 1, *253*
  oil, 192
  perch, 495
  Sablefish, 495
fish oil autoxidation, 192
flaked foods, 428
flavor of
  irradiated beef, 156, *258*
  maple sirup, *288*
  meat, 581
  passion fruit, 557
flavor uniformity of black pepper, 499
food carriers, *122*
food gum precipitation, 365
food odors, *239*
food poisoning organisms, 436
foods, irradiated, *204*
free amino groups of beef, 79
frozen foods, 1, *21*, *26*, 38, 53, *253*, 345, 457, 656
fruits, 31, 43, 49, 53, 56, 95, 125, 146, 443, 557
  564, 593

G

Gadus callarias, 462
gamma activity of pork and lamb, 475
gamma irradiation, 153, 178, *204*, *212*, 389
gastroenteritis, 618
gelation, 587, 600, 656
Geotrichum candidum, 518
gibberellin effect on composition of celery plants, *209*
Girard-T reagent, 43
granulation in oranges, *276*
grape
  juice, 644
  leaves, Muscadine, 600
grapefruit
  oil, aldehydes in 43
  peel, 146
green beans, 91, 345

H

heat injury in enterococci, *622*
hematin pigments of meats, *269*
hide powder, 600
honey, acidity of, 63
Hunter color meter, *26*
hydrogenated vegetable shortenings, 99

I

iodine-binding capacities of rice, 573
ionizing energy in green beans, 91
irradiated
  bacon lipids, 611
  beef, 15, 79, 112, 156, *258*, *412*
  beef odors, *212*
  foods, *204*
  meats, 178
  spores, 345
irradiation destruction, 153

J

jelly, *122*
juice, *276*, 557, 593, 644

L

Lactobacillus casei, 457
lamb, 475
lard, 99, *234*, 518
  substrate, 139
leaf extracts, 600
lemon
  fruits, 593
  oil, aldehydes in, 43
lettuce, 389
liberation by digestion, 663
lipid
  components, 198
  oxidation, 186, 198
lipids, *373*, 611
  in meat tissue, 581
  in sardines, *283*
lipohydroperoxide in soy extracts, 359
lipolytic activity of microorganisms, *234*, 518
longissimus dorsi, 485, 535

M

Maillard reaction, 248
maple sirup, 288, 397
mass spectrometry, 163
maturation process of peaches, 95
meats, 622, 631
  aging, 178
  cooked, 269
  cured, 269
  frozen, 1
  infusion of, 261
  irradiated, 178
  tissue lipids, 581
methylation effect in lard, 139
methylene blue-carrageenan reaction, 365
microbial development in cucumbers, 84
microbial growth in cheese, 72
microbial lipases, 518
microbicidal activity in food, 428
microscopic structure of frozen par-fried potatoes, 656
milk, 239
  irradiation flavor in, 258
mold, 373, 428, 518, 635
multiple pair comparison rating of eggs, 171
myosin inhibition in herring, 606

N

nicotine sulfate, 600
nitrogen constituents in potatoes, 351
nutritive value of
  beans, 525
  sardines, 283

O

odor measurement, 452
off-odor, 569
oil
  autoxidized salmon, 192
  orange, 401
oil content of fish, 495
oleomargarine, 99
olfactometer, 452
olives, 635
  California ripe, 227
orange
  navel, 443
  oil, 43, 401
  peel, 125, 146, 443
  pulp, 125, 443
  Valencia, 125, 276, 401
organoleptic ratings of beef, 79
oxidation inhibitors, 186
oxidation rates of dispersed lipid components, 198
oxidative damage by radiation, 448
oxidizing fat, 131

P

packing oil for sardines, 283
pad-plate method, 119
palatability of frozen par-fried potatoes, 656
papaya, 31
Paracolobactrum, 635
Passiflora edulis, 385
passion fruit
  juice, 557
  rind, 385
pasteurized cucumbers, 84
pathologic changes in mice, 611
peaches, 95
pears, Bartlett, 564
peas, 273
pectic substances of oranges, 125
pectinase inhibitor in grape leaves, 600
pectinolytic softening of cucumbers, 84
Penicillium roqueforti, 518
peroxidase activity in green beans, 91
pH buffer, 119
pH levels, 365
pH of
  beef, 156
  beef muscle, 422, 469
  bovine tissue, 314
  celery, 337
  cucumbers, 84
  dates, 323, 529
  juice, 276
  pineapple, 56
  pork, 297, 306
  pulp, 244
  sausage, 331
  soy extracts, 359
Phaseolus
  calcaratus, 525
  vulgaris, 525
phosphates in fish muscle, 462
photoelectric densitometer, 485
pies, frozen meat, 21
pigment in
  fruit rind, 385
  maple sirup, 397
pigment isomerization, 49, 53
pineapple, 49, 53, 56
Pisum sativum, 273
plant tissue, 416
  irradiated, 389
pork, 297, 306, 345, 475, 581, 631
post-mortem oxygen of bovine tissue, 314
post-mortem samples of pork, 297, 306
potato tubers, 492
potatoes
  frozen French-fried, 656
  Katahdin, 351
  Russet Burbank, 492
  Sebago, 492
preferences in grape juices, 644
pre-ferments for bread, 578
preservation of fish, 495
protein denaturation in fish, 253
protein fractions of beef, 112
proteolytic enzyme activity of stored beef, 156
Pseudomonas, 234
  fluorescens, 21
  fragi, 518
psoas major, 485

Q

quercetin in lard substrate, 139

R

rabbit muscle, 331
radiation damage, 448
radioresistance in foods, 345
rancid salmon oil, 192
reagent effects on crude preparations, 56
reconstitution of carrots, 479
reflectance color measurements, 26
refrigeration of cream, 436
retrogradation of starch, 587
rheology of cocoa butter, 99
Rhizopus oryzae, 373
rice
  Caloro, 573
  Century Patna, 573
  Rexoro, 573
  Zenith, 573
rigor, 178
rockfish, 38

S

Salmonellae isolation, 510
salt
  denaturation, 606
  influence in cucumbers, 84
sardine lipid, 283
sardines, Maine, 283
sauerkraut, 569
sausage, 331, 541, 551
semitendinosus, 331, 485
sensory evaluation of foods, 122
sensory scale comparison, 171
serological organisms, 618
sodium content in
  fruits, 31
  vegetables, 31
softening of
  cucumbers, 635
  olives, 635
soy
  extracts, 359
  flour, 359
soybean
  lipids, 373
  proteins, autoclaved, 663
specific gravity in potatoes, 351
spectral measurements of meat pigments, 269
spinach, frozen, 26
spore counts in foods, 345
Staphylococcus aureus, 21, 436, 457, 518, 631
starch, 587
storage of
  aquarium cod, 462
  beef, 15, 79, 156, 412
  carrots, 479
  cheese, 72
